

# First-then board

Shows your child what happens first and what comes next. Put a picture or word in each box.

## How to use it

1. Put the activity that comes first in the First box, like "shoes on".
2. Put something your child is looking forward to in the Then box, like "go outside".
3. Point to each box as you say it: "First shoes, then outside."
4. When the first part is done, point to Then and follow through straight away.
